Impact of science on society, 1979
Subject index

Air conditioning
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.

Antarctic ocean
The Antarctic Ocean: empty but international. Fleischmann, Kurt. (XXIX, 2) p. 175-182, illus.

Astrophysics
Antimatter and cosmology. Demaret, Jacques Louis. Vandermeulen, Jacques E. H. L. (XXIX, 1) p. 61-71.

Atomic physics
The Einstein century in the history of physics. Treder, Hans-Jürgen. (XXIX, 1) p. 37-43.

Audiovisual aids
Research and immediate education. Friedman, Yona. (XXIX, 3) p. 247-251, illus.

Australia
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.

Biological research
A Biological network to safeguard nature's unseen assets. DaSilva, Edgar J. (XXIX, 3) p. 261-263.

Biomass
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.

Biomedical research
The Sea's biomedical potential. Kaul, Pushkar N. (XXIX, 2) p. 123-134, illus.

Brazil
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.

Canada
Influencing the direction of university research: some problems. Benezra, Geneviève. (XXIX, 3) p. 231-239.
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.

China
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.

Climate
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.

Coal resources
Energy and the options for mankind. Mikkelsen, Tom. (XXIX, 4) p. 375-382.
2079: a century of technical and socio-political evolution. Mathisen, David A. (XXIX, 1) p. 83-93.

Communication media
Research and immediate education. Friedman, Yona. (XXIX, 3) p. 247-251, illus.

Cosmology
Antimatter and cosmology. Demaret, Jacques Louis. Vandermeulen, Jacques E. H. L. (XXIX, 1) p. 61-71.
Coherence, abstraction, and personal involvement: Albert Einstein, physicist and humanist. Ne'eman, Yuval. (XXIX, 1) p. 17-25.

Costs
Controlled thermonuclear fusion: status report. (XXIX, 4) p. 327-337, illus.
Energy research: long-range perspectives. Snow, Joel A. (XXIX, 3) p. 265-271.
Fusion and solar power viewed in terms of energy strategy. Häfele, Wolf. (XXIX, 4) p. 303-305.

Curriculum
Who will be the best equipped to teach physics in the 1980s? Robinson, Berol. (XXIX, 1) p. 45-47.

Developed countries
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
2079: a century of technical and socio-political evolution. Mathisen, David A. (XXIX, 1) p. 83-93.

Developing countries
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.
Renewable sources of energy and development. Sina Diatta, Christian. (XXIX, 4) p. 355-359.
2079: a century of technical and socio-political evolution. Mathisen, David A. (XXIX, 1) p. 83-93.

Development strategies
Are science and technology leading to a new pattern of development? Danzin, André. (XXIX, 3) p. 201-210.
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.

Disarmament
Coherence, abstraction, and personal involvement: Albert Einstein, physicist and humanist. Ne'eman, Yuval. (XXIX, 1) p. 17-25.
Drying
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.
Economic and social development
The Future of marine research in the Gulf region. Ali, Rifat Mustafa. (XXIX, 2) p. 145-153, map.
On the world's energy situation; comment. Kouzminov, Vladimir Alekseyevich. (XXIX, 4) p. 289-302, illus.
Educational programmes
A Biological network to safeguard nature's unseen assets. DaSilva, Edgar J. (XXIX, 3) p. 261-263.
Educational systems
Science in the face of intellectual needs. Malecki, Ignacy. (XXIX, 3) p. 273-279.
Einstein, Albert
The Circle and the line. Sinaceur, Mohammad Allal. (XXIX, 1) p. 27-35.
Coherence, abstraction, and personal involvement: Albert Einstein, physicist and humanist. Ne'eman, Yuval. (XXIX, 1) p. 17-25.
The Einstein century in the history of physics. Treder, Hans-Jürgen. (XXIX, 1) p. 37-43.
Einstein: open mind, open heart. M'Bow, Amadou Mahtar. (XXIX, 1) p. 15.
The Excellence of Einstein's theory of gravitation. Dirac, Paul Adrien Maurice. (XXIX, 1) p. 11-14.
A New measurement of time: the Einstein system. Aragòn, Mario Rodríguez. (XXIX, 1) p. 73-82.
Electrical energy
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.
Electricity
Forecast of the world's electrical demands until 2025. Claverie, Maurice J. Dupas, Alain P. (XXIX, 4) p. 347-354, map.
Electrodynamics
The Einstein century: four generations of revolutionary thought; comment. Bronowski, Jacob. (XXIX, 1) p. 3-9.
The Einstein century in the history of physics. Treder, Hans-Jürgen. (XXIX, 1) p. 37-43.
Electrolysis
Resources of the sea: a guide for terrestrials; comment. Griffiths, Raymond C. (XXIX, 2) p. 101-109.
Electromagnetism
The Circle and the line. Sinaceur, Mohammad Allal. (XXIX, 1) p. 27-35.
Energy balance
On the world's energy situation; comment. Kouzminov, Vladimir Alekseyevich. (XXIX, 4) p. 289-302, illus.
Energy consumption
Forecast of the world's electrical demands until 2025. Claverie, Maurice J. Dupas, Alain P. (XXIX, 4) p. 347-354, map.
On the world's energy situation; comment. Kouzminov, Vladimir Alekseyevich. (XXIX, 4) p. 289-302, illus.
2079: a century of technical and socio-political evolution. Mathisen, David A. (XXIX, 1) p. 83-93.
Energy conversion
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Energy policy
Energy research: long-range perspectives. Snow, Joel A. (XXIX, 3) p. 265-271.
Fusion and solar power viewed in terms of energy strategy. Häfele, Wolf. (XXIX, 4) p. 303-305.
Energy resources
Energy and the options for mankind. Mikkelsen, Tom. (XXIX, 4) p. 375-382.
Energy research: long-range perspectives. Snow, Joel A. (XXIX, 3) p. 265-271.
On the world's energy situation; comment. Kouzminov, Vladimir Alekseyevich. (XXIX, 4) p. 289-302, illus.
Renewable sources of energy and development. Sina Diatta, Christian. (XXIX, 4) p. 355-359.
Resources of the sea: a guide for terrestrials; comment. Griffiths, Raymond C. (XXIX, 2) p. 101-109.
Energy shortages
2079: a century of technical and socio-political evolution. Mathisen, David A. (XXIX, 1) p. 83-93.
Energy utilization
On the world's energy situation; comment. Kouzminov, Vladimir Alekseyevich. (XXIX, 4) p. 289-302, illus.
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.
Environment
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.
Environmental control
Oil spills: the management of risk. Cousteau, Jacques Yves. (XXIX, 2) p. 155-156.
Evaluation
Evaluating the impact of scientific technology. (29, 3) p. 217-221.
Influencing the direction of university research: some problems. Benezra, Geneviève. (XXIX, 3) p. 231-239.
Fishery resources
Using the sea's food resources. Zaitsev, Vikenty P. (XXIX, 2) p. 157-162, illus.

Food resources
Marine microbes and macrobes: renewable supply. DaSilva, Edgar J. (XXIX, 2) p. 163-173, illus.
Using the sea's food resources. Zaitsev, Vikenty P. (XXIX, 2) p. 157-162, illus.
Forecasting
Forecast of the world's electrical demands until 2025. Claverie, Maurice J. Dupas, Alain P. (XXIX, 4) p. 347-354, map.
France
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Fuel resources
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
On the world's energy situation; comment. Kouzminov, Vladimir Alekseyevich. (XXIX, 4) p. 289-302, illus.
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Fusion reactors
Controlled thermonuclear fusion: status report. (XXIX, 4) p. 327-337, illus.
Future society
Are science and technology leading to a new pattern of development? Danzin, André. (XXIX, 3) p. 201-210.
Gravitation
The Circle and the line. Sinaceur, Mohammad Allal. (XXIX, 1) p. 27-35.
The Einstein century in the history of physics. Treder, Hans-Jürgen. (XXIX, 1) p. 37-43.
The Excellence of Einstein's theory of gravitation. Dirac, Paul Adrien Maurice. (XXIX, 1) p. 11-14.
Gulf states
The Future of marine research in the Gulf region. Ali, Rifat Mustafa. (XXIX, 2) p. 145-153, map.
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.
Heat transfer
Resources of the sea: a guide for terrestrials; comment. Griffiths, Raymond C. (XXIX, 2) p. 101-109.
Heating equipment
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.
Higher education
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.
History of science
The Einstein century: four generations of revolutionary thought; comment. Bronowski, Jacob. (XXIX, 1) p. 3-9.
The Einstein century in the history of physics. Treder, Hans-Jürgen. (XXIX, 1) p. 37-43.
Housing design
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.
Human needs
Research and immediate education. Friedman, Yona. (XXIX, 3) p. 247-251, illus.
Science in the face of intellectual needs. Malecki, Ignacy. (XXIX, 3) p. 273-279.
Scientific-technical progress and the social goals of science. Gvishiani, Djermen M. (XXIX, 3) p. 211-216.
Towards a synthesis of a study of the social value of science; comment. Petrovski, Stanislav A. Khairov, Rustam I. (XXIX, 3) p. 191-199.
Hydrogen
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
Hydrology
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.
India
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Industrialization
Renewable sources of energy and development. Sina Diatta, Christian. (XXIX, 4) p. 355-359.
International standards
A New measurement of time: the Einstein system. Aragòn, Mario Rodríguez. (XXIX, 1) p. 73-82.
Oil spills: the management of risk. Cousteau, Jacques Yves. (XXIX, 2) p. 155-156.
Legal status
The Antarctic Ocean: empty but international. Fleischmann, Kurt. (XXIX, 2) p. 175-182, illus.
Marine algae
Marine microbes and macrobes: renewable supply. DaSilva, Edgar J. (XXIX, 2) p. 163-173, illus.
Marine biology
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.
Marine geology
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.
Marine pollution
The Future of marine research in the Gulf region. Ali, Rifat Mustafa. (XXIX, 2) p. 145-153, map.
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.
Marine resources
The Antarctic Ocean: empty but international. Fleischmann, Kurt. (XXIX, 2) p. 175-182, illus.
Marine microbes and macrobes: renewable supply. DaSilva, Edgar J. (XXIX, 2) p. 163-173, illus.
Resources of the sea: a guide for terrestrials; comment. Griffiths, Raymond C. (XXIX, 2) p. 101-109.
The Sea's biomedical potential. Kaul, Pushkar N. (XXIX, 2) p. 123-134, illus.
Mass transfer
Resources of the sea: a guide for terrestrials; comment. Griffiths, Raymond C. (XXIX, 2) p. 101-109.

Mathematical analysis
A New measurement of time: the Einstein system. Aragòn, Mario Rodríguez. (XXIX, 1) p. 73-82.
Mathematical models
Antimatter and cosmology. Demaret, Jacques Louis. Vandermeulen, Jacques E. H. L. (XXIX, 1) p. 61-71.
Are science and technology leading to a new pattern of development? Danzin, André. (XXIX, 3) p. 201-210.
Scientific-technical progress and the social goals of science. Gvishiani, Djermen M. (XXIX, 3) p. 211-216.
Mechanics
The Excellence of Einstein's theory of gravitation. Dirac, Paul Adrien Maurice. (XXIX, 1) p. 11-14.
Methodology
Towards a synthesis of a study of the social value of science; comment. Petrovski, Stanislav A. Khairov, Rustam I. (XXIX, 3) p. 191-199.
Metrology
A New measurement of time: the Einstein system. Aragòn, Mario Rodríguez. (XXIX, 1) p. 73-82.
Microbiological resources
A Biological network to safeguard nature's unseen assets. DaSilva, Edgar J. (XXIX, 3) p. 261-263.
Microorganisms
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
Mineral resources
The Antarctic Ocean: empty but international. Fleischmann, Kurt. (XXIX, 2) p. 175-182, illus.
Models
Towards a synthesis of a study of the social value of science; comment. Petrovski, Stanislav A. Khairov, Rustam I. (XXIX, 3) p. 191-199.
National development
Are science and technology leading to a new pattern of development? Danzin, André. (XXIX, 3) p. 201-210.
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.
Natural resources
A Biological network to safeguard nature's unseen assets. DaSilva, Edgar J. (XXIX, 3) p. 261-263.
Nazism
Coherence, abstraction, and personal involvement: Albert Einstein, physicist and humanist. Ne'eman, Yuval. (XXIX, 1) p. 17-25.
New Zealand
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Nuclear energy
Energy and the options for mankind. Mikkelsen, Tom. (XXIX, 4) p. 375-382.
Fusion and solar power viewed in terms of energy strategy. Häfele, Wolf. (XXIX, 4) p. 303-305.
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.
Nuclear fusion
Controlled thermonuclear fusion: status report. (XXIX, 4) p. 327-337, illus.
Development of pure fusion. Grieger, G. Palumbo, D. (XXIX, 4) p. 339-342.
Energy and the options for mankind. Mikkelsen, Tom. (XXIX, 4) p. 375-382.
Oceanographic laboratories
Development and management of small marine research laboratories. Brodie, James W. (XXIX, 2) p. 111-122, illus.
Oceanographic research
The Antarctic Ocean: empty but international. Fleischmann, Kurt. (XXIX, 2) p. 175-182, illus.
Development and management of small marine research laboratories. Brodie, James W. (XXIX, 2) p. 111-122, illus.
The Future of marine research in the Gulf region. Ali, Rifat Mustafa. (XXIX, 2) p. 145-153, map.
Marine microbes and macrobes: renewable supply. DaSilva, Edgar J. (XXIX, 2) p. 163-173, illus.
The Sea's biomedical potential. Kaul, Pushkar N. (XXIX, 2) p. 123-134, illus.
Using the sea's food resources. Zaitsev, Vikenty P. (XXIX, 2) p. 157-162, illus.
Oceanography
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.
Oceanography education
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.
Oil pollution
Oil spills: the management of risk. Cousteau, Jacques Yves. (XXIX, 2) p. 155-156.
Pacifism
Coherence, abstraction, and personal involvement: Albert Einstein, physicist and humanist. Ne'eman, Yuval. (XXIX, 1) p. 17-25.
Performance
Scientific-technical progress and the social goals of science. Gvishiani, Djermen M. (XXIX, 3) p. 211-216.
Pharmaceutical technology
Marine microbes and macrobes: renewable supply. DaSilva, Edgar J. (XXIX, 2) p. 163-173, illus.
The Sea's biomedical potential. Kaul, Pushkar N. (XXIX, 2) p. 123-134, illus.
Philippines
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Photosynthesis
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.

Physical oceanography
The Future of marine research in the Gulf region. Ali, Rifat Mustafa. (XXIX, 2) p. 145-153, map.
Physics
Coherence, abstraction, and personal involvement: Albert Einstein, physicist and humanist. Ne'eman, Yuval. (XXIX, 1) p. 17-25.
The Einstein century in the history of physics. Treder, Hans-Jürgen. (XXIX, 1) p. 37-43.
Physics education
Who will be the best equipped to teach physics in the 1980s? Robinson, Berol. (XXIX, 1) p. 45-47.
Pictures
Research and immediate education. Friedman, Yona. (XXIX, 3) p. 247-251, illus.
Plankton
Marine microbes and macrobes: renewable supply. DaSilva, Edgar J. (XXIX, 2) p. 163-173, illus.
Plasma physics
Controlled thermonuclear fusion: status report. (XXIX, 4) p. 327-337, illus.
Development of pure fusion. Grieger, G. Palumbo, D. (XXIX, 4) p. 339-342.
Political behaviour
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.
Public opinion
Science in the face of intellectual needs. Malecki, Ignacy. (XXIX, 3) p. 273-279.
Pumping
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.
Quantum theory
The Circle and the line. Sinaceur, Mohammad Allal. (XXIX, 1) p. 27-35.
The Einstein century in the history of physics. Treder, Hans-Jürgen. (XXIX, 1) p. 37-43.
Radiation
Antimatter and cosmology. Demaret, Jacques Louis. Vandermeulen, Jacques E. H. L. (XXIX, 1) p. 61-71.
Radiation effects
Controlled thermonuclear fusion: status report. (XXIX, 4) p. 327-337, illus.
Regional cooperation
The Future of marine research in the Gulf region. Ali, Rifat Mustafa. (XXIX, 2) p. 145-153, map.
Relativity theory
The Circle and the line. Sinaceur, Mohammad Allal. (XXIX, 1) p. 27-35.
Coherence, abstraction, and personal involvement: Albert Einstein, physicist and humanist. Ne'eman, Yuval. (XXIX, 1) p. 17-25.
The Einstein century: four generations of revolutionary thought; comment. Bronowski, Jacob. (XXIX, 1) p. 3-9.
The Einstein century in the history of physics. Treder, Hans-Jürgen. (XXIX, 1) p. 37-43.
The Excellence of Einstein's theory of gravitation. Dirac, Paul Adrien Maurice. (XXIX, 1) p. 11-14.
Research and development
Controlled thermonuclear fusion: status report. (XXIX, 4) p. 327-337, illus.
Development of pure fusion. Grieger, G. Palumbo, D. (XXIX, 4) p. 339-342.
Renewable sources of energy and development. Sina Diatta, Christian. (XXIX, 4) p. 355-359.
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Research facilities
Development and management of small marine research laboratories. Brodie, James W. (XXIX, 2) p. 111-122, illus.
Research management
Development and management of small marine research laboratories. Brodie, James W. (XXIX, 2) p. 111-122, illus.
Research policy
Influencing the direction of university research: some problems. Benezra, Geneviève. (XXIX, 3) p. 231-239.
Research ships
Development and management of small marine research laboratories. Brodie, James W. (XXIX, 2) p. 111-122, illus.
Research training
Influencing the direction of university research: some problems. Benezra, Geneviève. (XXIX, 3) p. 231-239.
Research workers
Influencing the direction of university research: some problems. Benezra, Geneviève. (XXIX, 3) p. 231-239.
Resistance to change
Science in the face of intellectual needs. Malecki, Ignacy. (XXIX, 3) p. 273-279.
Role of education
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.
Roofs
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.
Safety measures
Oil spills: the management of risk. Cousteau, Jacques Yves. (XXIX, 2) p. 155-156.
Sahel
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Science and technology
Are science and technology leading to a new pattern of development? Danzin, André. (XXIX, 3) p. 201-210.
The Scientific and technical revolution in the Socialist Republic of Viet Nam. Nguyên Khac Viên. (XXIX, 3) p. 241-245.
Towards a synthesis of a study of the social value of science; comment. Petrovski, Stanislav A. Khairov, Rustam I. (XXIX, 3) p. 191-199.
Science philosophy
The Circle and the line. Sinaceur, Mohammad Allal. (XXIX, 1) p. 27-35.
The Einstein century: four generations of

revolutionary thought; comment. Bronowski, Jacob. (XXIX, 1) p. 3-9.

Science policy
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.
The Scientific and technical revolution in the Socialist Republic of Viet Nam. Nguyên Khac Viên. (XXIX, 3) p. 241-245.
Scientific-technical progress and the social goals of science. Gvishiani, Djermen M. (XXIX, 3) p. 211-216.

Science popularization
Research and immediate education. Friedman, Yona. (XXIX, 3) p. 247-251, illus.

Scientific cooperation
The Antarctic Ocean: empty but international. Fleischmann, Kurt. (XXIX, 2) p. 175-182, illus.

Scientific discoveries
Evaluating the impact of scientific technology. (29, 3) p. 217-221.

Scientific research
Are science and technology leading to a new pattern of development? Danzin, André. (XXIX, 3) p. 201-210.
Energy research: long-range perspectives. Snow, Joel A. (XXIX, 3) p. 265-271.
Influencing the direction of university research: some problems. Benezra, Geneviève. (XXIX, 3) p. 231-239.
Research and immediate education. Friedman, Yona. (XXIX, 3) p. 247-251, illus.
The Scientific and technical revolution in the Socialist Republic of Viet Nam. Nguyên Khac Viên. (XXIX, 3) p. 241-245.
Scientific-technical progress and the social goals of science. Gvishiani, Djermen M. (XXIX, 3) p. 211-216.

Sea water
Resources of the sea: a guide for terrestrials; comment. Griffiths, Raymond C. (XXIX, 2) p. 101-109.

Seismology
Marine science in the Gulf. Kashfi, Mansour S. (XXIX, 2) p. 135-144, map.

Simulation models
Forecast of the world's electrical demands until 2025. Claverie, Maurice J. Dupas, Alain P. (XXIX, 4) p. 347-354, map.

Social values
Towards a synthesis of a study of the social value of science; comment. Petrovski, Stanislav A. Khairov, Rustam I. (XXIX, 3) p. 191-199.

Sociology of science
Science in the face of intellectual needs. Malecki, Ignacy. (XXIX, 3) p. 273-279.

Solar energy
Energy and the options for mankind. Mikkelsen, Tom. (XXIX, 4) p. 375-382.
Forecast of the world's electrical demands until 2025. Claverie, Maurice J. Dupas, Alain P. (XXIX, 4) p. 347-354, map.
Fusion and solar power viewed in terms of energy strategy. Häfele, Wolf. (XXIX, 4) p. 303-305.
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.
Renewable sources of energy and development. Sina Diatta, Christian. (XXIX, 4) p. 355-359.
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.

Solar heating
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.

Solar power generation
Forecast of the world's electrical demands until 2025. Claverie, Maurice J. Dupas, Alain P. (XXIX, 4) p. 347-354, map.

Solar radiation
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.
2079: a century of technical and socio-political evolution. Mathisen, David A. (XXIX, 1) p. 83-93.

Supply and demand
Forecast of the world's electrical demands until 2025. Claverie, Maurice J. Dupas, Alain P. (XXIX, 4) p. 347-354, map.

Surface tension
Resources of the sea: a guide for terrestrials; comment. Griffiths, Raymond C. (XXIX, 2) p. 101-109.

Sweden
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.

Systems analysis
Scientific-technical progress and the social goals of science. Gvishiani, Djermen M. (XXIX, 3) p. 211-216.

Teacher training
Who will be the best equipped to teach physics in the 1980s? Robinson, Berol. (XXIX, 1) p. 45-47.

Teaching methods
Research and immediate education. Friedman, Yona. (XXIX, 3) p. 247-251, illus.
Who will be the best equipped to teach physics in the 1980s? Robinson, Berol. (XXIX, 1) p. 45-47.

Technological innovation
Renewable sources of energy and development. Sina Diatta, Christian. (XXIX, 4) p. 355-359.

Technology
2079: a century of technical and socio-political evolution. Mathisen, David A. (XXIX, 1) p. 83-93.

Technology assessment
Evaluating the impact of scientific technology. (29, 3) p. 217-221.

Technology transfer
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.
Renewable sources of energy and development. Sina Diatta, Christian. (XXIX, 4) p. 355-359.

Thermodynamics
Resources of the sea: a guide for terrestrials; comment. Griffiths, Raymond C. (XXIX, 2) p. 101-109.

Time measurement and instruments
A New measurement of time: the Einstein system. Aragòn, Mario Rodríguez. (XXIX, 1) p. 73-82.
UK
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.
Units of measurement
A New measurement of time: the Einstein system. Aragòn, Mario Rodríguez. (XXIX, 1) p. 73-82.
University cooperation
Influencing the direction of university research: some problems. Benezra, Geneviève. (XXIX, 3) p. 231-239.
USA
Energy research: long-range perspectives. Snow, Joel A. (XXIX, 3) p. 265-271.
Evaluating the impact of scientific technology. (29, 3) p. 217-221.
Knowledge transfer and the universities: a policy dilemma. D'Ambrosio, Ubiratan. (XXIX, 3) p. 223-229.
The Sea's biomedical potential. Kaul, Pushkar N. (XXIX, 2) p. 123-134, illus.
The Status of solar energy as fuel. Hall, D.O. (XXIX, 4) p. 307-317, illus.
Ussr
Using the sea's food resources. Zaitsev, Vikenty P. (XXIX, 2) p. 157-162, illus.
Viet Nam SR
The Scientific and technical revolution in the Socialist Republic of Viet Nam. Nguyên Khac Viên. (XXIX, 3) p. 241-245.
Waste treatment
Micro-organisms as tools for biomass conversion and energy generation. DaSilva, Edgar J. (XXIX, 4) p. 361-373, illus., map.
2079: a century of technical and socio-political evolution. Mathisen, David A. (XXIX, 1) p. 83-93.
Water storage
Designing self-sufficient housing for temperate climate. Armstrong, George. (XXIX, 3) p. 253-260, illus.
Wind power
The Prospects of solar energy for developing nations. Ramachandran, A. Gururaja, J. (XXIX, 4) p. 319-326.

Impact of science on society, 1979
Author index

Ali, Rifat Mustafa
The Future of marine research in the Gulf region. (XXIX, 2) p. 145-153, map.

Aragòn, Mario Rodríguez
A New measurement of time: the Einstein system. (XXIX, 1) p. 73-82.

Armstrong, George
Designing self-sufficient housing for temperate climate. (XXIX, 3) p. 253-260, illus.

Benezra, Geneviève
Influencing the direction of university research: some problems. (XXIX, 3) p. 231-239.

Brodie, James W.
Development and management of small marine research laboratories. (XXIX, 2) p. 111-122, illus.

Bronowski, Jacob
The Einstein century: four generations of revolutionary thought; comment. (XXIX, 1) p. 3-9.

Claverie, Maurice J.
Forecast of the world's electrical demands until 2025. (XXIX, 4) p. 347-354, map.

Cousteau, Jacques Yves
Oil spills: the management of risk. (XXIX, 2) p. 155-156.

D'Ambrosio, Ubiratan
Knowledge transfer and the universities: a policy dilemma. (XXIX, 3) p. 223-229.

Danzin, André
Are science and technology leading to a new pattern of development? (XXIX, 3) p. 201-210.

DaSilva, Edgar J.
A Biological network to safeguard nature's unseen assets. (XXIX, 3) p. 261-263.
Marine microbes and macrobes: renewable supply. (XXIX, 2) p. 163-173, illus.
Micro-organisms as tools for biomass conversion and energy generation. (XXIX, 4) p. 361-373, illus., map.

Demaret, Jacques Louis
Antimatter and cosmology. (XXIX, 1) p. 61-71.

Dirac, Paul Adrien Maurice
The Excellence of Einstein's theory of gravitation. (XXIX, 1) p. 11-14.

Dupas, Alain P.
Forecast of the world's electrical demands until 2025. (XXIX, 4) p. 347-354, map.

Fleischmann, Kurt
The Antarctic Ocean: empty but international. (XXIX, 2) p. 175-182, illus.

Friedman, Yona
Research and immediate education. (XXIX, 3) p. 247-251, illus.

Grieger, G.
Development of pure fusion. (XXIX, 4) p. 339-342.

Griffiths, Raymond C.
Resources of the sea: a guide for terrestrials; comment. (XXIX, 2) p. 101-109.

Gururaja, J.
The Prospects of solar energy for developing nations. (XXIX, 4) p. 319-326.

Gvishiani, Djermen M.
Scientific-technical progress and the social goals of science. (XXIX, 3) p. 211-216.

Häfele, Wolf
Fusion and solar power viewed in terms of energy strategy. (XXIX, 4) p. 303-305.

Hall, D.O.
The Status of solar energy as fuel. (XXIX, 4) p. 307-317, illus.

Kashfi, Mansour S.
Marine science in the Gulf. (XXIX, 2) p. 135-144, map.

Kaul, Pushkar N.
The Sea's biomedical potential. (XXIX, 2) p. 123-134, illus.

Khairov, Rustam I.
Towards a synthesis of a study of the social value of science; comment. (XXIX, 3) p. 191-199.

Kouzminov, Vladimir Alekseyevich
On the world's energy situation; comment. (XXIX, 4) p. 289-302, illus.

Malecki, Ignacy
Science in the face of intellectual needs. (XXIX, 3) p. 273-279.

Mathisen, David A.
2079: a century of technical and socio-political evolution. (XXIX, 1) p. 83-93.

M'Bow, Amadou Mahtar
Einstein: open mind, open heart. (XXIX, 1) p. 15.

Mikkelsen, Tom
Energy and the options for mankind. (XXIX, 4) p. 375-382.

Ne'eman, Yuval
Coherence, abstraction, and personal involvement: Albert Einstein, physicist and humanist. (XXIX, 1) p. 17-25.

Nguyên Khac Viên
The Scientific and technical revolution in the Socialist Republic of Viet Nam. (XXIX, 3) p. 241-245.

Palumbo, D.
Development of pure fusion. (XXIX, 4) p. 339-342.

Petrovski, Stanislav A.
Towards a synthesis of a study of the social value of science; comment. (XXIX, 3) p. 191-199.
Ramachandran, A.
The Prospects of solar energy for developing nations. (XXIX, 4) p. 319-326.
Robinson, Berol
Who will be the best equipped to teach physics in the 1980s? (XXIX, 1) p. 45-47.
Sina Diatta, Christian
Renewable sources of energy and development. (XXIX, 4) p. 355-359.
Sinaceur, Mohammad Allal
The Circle and the line. (XXIX, 1) p. 27-35.
Snow, Joel A.
Energy research: long-range perspectives. (XXIX, 3) p. 265-271.
Treder, Hans-Jürgen
The Einstein century in the history of physics. (XXIX, 1) p. 37-43.
Vandermeulen, Jacques E. H. L.
Antimatter and cosmology. (XXIX, 1) p. 61-71.
Zaitsev, Vikenty P.
Using the sea's food resources. (XXIX, 2) p. 157-162, illus.
